1980$ agricultural statistics

FOREWORD

As we head into the "Eighties", North Carolina farmers will need to be more enlightened and informed than ever before to stay in business. Farming is a highly rewarding but competitive enterprise. It is a way of life for families that can't be matched. But even if a farmer has the best information and uses it wisely, he can have a bad economic year because of the weather or other things beyond his control.

Farming is a rewarding but risky business. The purpose of this bulletin is to provide comprehensive, detailed information on North Carolina's abundant agriculture—information intended to assist our farmers in reducing some of the ever-present risks of farming.

The "Eighties" are bringing a special concern and need for modifying farming cultural practices to be energy efficient. Pencils will need to be sharpened to know whether another trip through the field with the tractor and equipment is cost-effective. Our farmers will need to be good managers, keep up with the best methods and the best yielding varieties, to make it in this new decade.

I have complete confidence that we will make it. Farmers in our country already are the most productive of any in the world. One U. S. farmer now feeds 68 people and as a result, is the envy of the whole world.

James A. Graham

REVIEW OF 1979 SEASON

1979 WEATHER AND CROP ROUND UP

Early in the year, most farm activities were slowed by extreme weather conditions across the state. A major storm on February 18 brought 7 to 17 inches of snow to the state with the Mountain Region receiving the heaviest amounts. A few days later, the melting snow coupled with fresh rains, caused light flooding in some low areas.

In early spring, field work had an excellent start but then was restricted somewhat by surplus soil moisture. The early spring temperatures were above normal, reaching the upper 70's several times in March. These above normal temperatures resulted in conditions very suitable for field work. Land preparation and spring planting progressed rapidly in April. By April 30, farmers had transplanted about 35 percent of their tobacco acreage, almost double the normal amount. Plantings of most crops, including spring and summer vegetables, were on schedule. Exceptions were the peanut and soybean crops which were delayed by excessive rainfall in May. Early June brought more excessive rains as well as some record low temperatures.

The independent truckers strike occurred at the beginning of the vegetable harvest, thus, creating problems for the farmers who were relying on these truckers to get their produce to market. Other problems also evolved in July as fuel supplies tightened, gasoline prices rose and dry weather persisted. Toward the end of July, however, prospects for most crops improved with needed rains. August was a good month for most North Carolina farmers as crops continued to grow well and they were able to make good progress in harvesting tobacco, hay, corn silage, fruits, and vegetables. Most seasonal vegetables were in generous supply.

Tropical storm David passed through the state on September 5 and left behind over 10 inches of rainfall with the Coastal Plains receiving the heaviest amounts. Wind damage was light but some flooding occurred in low lying areas. Harvesting activities, especially for sweet potatoes and peanuts, were slowed by the storm. On the other hand, small grain germination was aided by the precipitation. Harvest of flue-cured tobacco neared completion during the first part of September, a little ahead of normal; however, yields averaged lower than expected due to blue mold damage. The burley tobacco crop was the most severely affected by the disease. During October, corn harvest made good progress while the harvest of cotton, peanuts, sweet potatoes, and apples lagged somewhat behind the normal pace. During November, harvest gained momentum as did seeding of small grains. December was characterized by above normal temperatures. During the month, soil moisture supplies continued adequate, and farmers were able to virtually complete soybean harvest.

FLUE-CURED CROP SMALLER

The 1979 flue-cured tobacco crop in North Carolina is estimated at 612.9 million pounds. This was 26% less than the 1978 production and the lowest since 1943. The short crop resulted from a reduction in harvested acreage as well as a sharp decline in yield from the previous year. The harvested acreage at 327,000 was down 16% from a year ago while yields averaged 1,874 pounds per acre compared to 2,124 pounds recorded in 1978.

The value of the crop at $855 million was down 23% from the previous year. The season's average price was $1.395 per pound.

RECORD HIGH SOYBEAN CROP

Soybean production in North Carolina during 1979 reached a record high 45.8 million bushels, up 11% from the previous record of 41.2 million bushels produced in 1978. The sharp increase in harvested acreage more than offset the moderate decline in the yield. The 1979 yield averaged 23.5 bushels per acre compared to 24.5 bushels for 1978; the record high yield is 26.0 bushels per acre recorded in 1969. Harvested acres for 1979 was an all time high at 1,950,000 and also was 16% above the 1978 acreage.

The season's average price was $6.40 per bushel, a decline of $.17 from the previous year's price. However, the total value of the crop increased 8% to $293 million.

CORN PRODUCTION UP

Production of corn for grain in North Carolina totaled 128.4 million bushels in 1979, an increase of 6% from 1978. The yield at 76 bushels per acre was unchanged from a year ago. The acreage harvested for grain this past year, set at 1,690,000 acres, was up 6% from the previous year.

The value of the Tar Heel crop was $360 million, up 23% from a year earlier. The average price per bushel increased to $2.80 in 1979 from $2.40 in 1978.

BURLEY TOBACCO DOWN SHARPLY

The 1979 burley tobacco crop in North Carolina is estimated at 8.51 million pounds, down 59% from 1978 and the smallest crop since 1942. Damages from excess moisture and from blue mold were the primary reasons for the short crop. The average yield per acre is estimated at 1,135 pounds, less than half the average of 2,415 pounds from the 1978 crop. Harvested acreage at 7,500 was down 1200 acres from a year earlier.

The value of production was $12.0 million, about 55 percent less than the value for the 1978 crop.

PEANUT CROP SMALLER

Peanut production in North Carolina for 1979 is estimated at 378.5 million pounds, 19% less than the previous year's production. The decline was due to the sharp drop in yields which fell to an average of 2,280 pounds per acre. In 1978 farmers had record high yields averaging 2,825 pounds per acre. Harvested acres at 166,000 were unchanged from a year ago.

The value of the peanut crop was $77.2 million, down 25% from the previous year's record high. The season's average price was $.204 per pound.

WHEAT PRODUCTION UP SHARPLY

North Carolina wheat production totaled 7,560,000 bushels during 1979, a 27 percent increase from a year ago. Harvested acres totaled 210,000 which compares to 180,000 acres for 1978. The average yield per acre was estimated at 36 bushels, up 3 bushels from the previous year.

The value of the wheat crop is placed at $28 million, a sharp increase of 65% from the 1978 value. The season's average price at $3.70 per bushel showed an increase of $.85 from the previous year's average.

LARGER APPLE AND PEACH CROPS

The apple crop in North Carolina totaled 350 million pounds in 1979, up from the 1978 production of 324 million pounds.

Peach production also showed an increase over the previous year with 50 million pounds produced, 11% above the 1978 production and 43% above that for 1977.

COTTON PRODUCTION DECLINES

Cotton production in North Carolina during 1979 totaled 43,000 bales (480-lbs. net), down 4% from the previous year. The average yield at 455 pounds per acre compares to the record high of 515 pounds produced in 1978. Harvested acreage totaled 45,000 acres, up 3,000 from a year earlier.

The value of cotton lint was $13.4 million, down 5% from the previous year. The season's average price at $.647 per pound was down slightly from the 1978 price of $.654. The value of cottonseed was $1.9 million in 1979; the average price for cottonseed was $124 per ton.

N. C. LEADING PRODUCER OF YAMS

In 1979 North Carolina continued as the leading producer of sweet potatoes in the United States, accounting for 34% of the national total. Harvested acreage for 1979 at 41,000 was up 11% from a year ago. Yield per acre, however, was down 20 cwt. from last season to 120 cwt. Total production was 4,920,000 cwt. for 1979, a decline of 5% from the previous year.

The season's average price was estimated at $7.59 per cwt., down sharply from the $9.57 average in 1978. The total value of the crop at $37 million was down 25 percent from the prior year.

---

[1] The season average price is based on the part of the crop that is sold and is applied to the production estimate to compute the value of production. [2] Values are for the crop year and should not be confused with calendar year income. [3] Includes hogged or grazed and that cut and fed without removing grain. [4] Green weight. [5] Production in 480-lb. net weight bales. [6] Includes small quantities for processing. [7] Prices for processing vegetables are plant-door prices.

LIVESTOCK, DAIRY & POULTRY

REVIEW OF 1979

TOTAL INCOME DOWN

Income from livestock, dairy and poultry products totaled approximately $1.4 billion in 1979, a 10% increase from 1978. All poultry products combined made up approximately $722 million while income for broilers alone amounted to $386 million or 28% of the total. Cash receipts from hogs held steady at $301 million, the same as the previous year. This is 22% of the total. Milk income rose 12%. Income from cattle and calves continued to rise to $169 million, up sharply from 1978. Cattle and calves accounted for 12% of total cash receipts.

EGG PRODUCTION UP

The number of eggs produced in North Carolina during 1979 was up 2% to 3.2 billion eggs. The average number of layers on hand was 13.3 million, up 4% from 1978. However, eggs per layer decreased 2% from 1978 to the level of 238 eggs.

Cash receipts in the state was 10% higher in 1979 at $173 million while the price of eggs per dozen increased 7% to 66.1¢. With this increase the state still dropped by one position to number 6 nationally in cash receipts from eggs.

INCREASE IN HOG PRODUCTION CONTINUES

The December 1, 1979 inventory of hogs and pigs on North Carolina farms showed an annual increase of 11% to 2,600,000 head. The state continues to rank seventh nationally in total hog numbers. Farrowing were up 20% to 559,000 in 1979 for an average of 7.17 pigs per litter, a slightly higher average than in 1978. A crop of 4,010,000 pigs was produced in the state, 20% more than the preceding year.

Hog marketing showed a 15% increase of 3,398,000 head. Increased marketing, along with a 9% decrease in the average price at $42.30 cwt., gave a slight drop in cash receipts to $301 million for the state. The value of home consumption was 19 million, down 17% from 1978.

NUMBER TWO IN TURKEYS

The state's 23% increase in total number of turkeys is moving it closer to the number one spot in the national ranking, held by Minnesota. The number produced totaled slightly more than 23 million birds while the pounds of meat produced rose 23% to 397 million pounds. Live weight price at 41¢, down 5% lead to a gross income of $163 million.

MILK PRODUCTION HELD STEADY

Total milk production remained at 1.6 billion pounds in 1979, the same as 1978. The number of milk cows decreased 1% at 141,000 head for the state. Milk output per cow increased slightly from the previous year to 11,099 pounds.

Cash receipts from sales of milk and cream totaled $192 million, up 12% from a year earlier. The total value of milk produced was up 12% to $201 million. Fluid milk prices rose 11% from 1978 to $12.70 cwt.

FOURTH IN BROILER

North Carolina held on to its number four ranking in broilers in 1979 with a total of 377 million birds produced, an increase of 7%. Pounds of meat produced also increased 9% to 1.5 billion.

The average price per pound for broilers dropped 3% to 25.0¢. This gave a gross income of $386 million for the state, a 5% increase from the previous year.

Income from broilers is the largest contributor to cash receipts for the livestock and poultry commodity group. In recent years, it has made up 28% of the total income for this group.

INCOME FROM CATTLE CONTINUES TO RISE

Cash receipts from cattle and calves in the state continues to rise at 45% in 1979 to a total of $169 million. Average prices of $57.20 cwt. for cattle and $82.10 cwt. for calves contributed to this increase. The value of cattle and calves consumed on the farm rose 18% in 1979 to $7.9 million.

The inventory of cattle and calves on Tarheel farms as of January 1, 1980 was 1.1 million head, the same as a year earlier. Calf births showed a 4% decrease during the year at 470,000 head. Calf marketings dropped 5% to 195,000 while total cattle and calf marketings dropped 8% to 412,000 head.

SHEEP NUMBER INCREASES

The number of sheep and lambs in North Carolina increased to 7,500 head as of January 1, 1980 from the level of 7,000 a year earlier. The lamb crop was down 5% at 6,100 head for the year.

A decrease in marketings of sheep was partially offset by an increase in prices; however, a 20% decrease in cash receipts for the year to $147,000 was noted.

Motor oil, regular (non-detergent), per gallon	**2.60**	2.31	2.17	2.13
Motor oil, heavy duty (detergent), per gallon	**2.99**	2.70	2.56	2.53
Grease, per 35 pound pail	**19.43**	16.75	15.23	13.93
Storage batteries, cpr 220-310 amps	**45.45**	39.53	36.95	35.15
Spark plugs	**1.58**	1.44	1.39	1.32
Antifreeze, permanent type, per gallon	**4.15**	3.82	4.16	4.54
Oil filters, cartridge refill	**3.35**	3.16	3.11	3.03
Tires, tractor, rear, 18.4-34, 6-ply	**310.50**	284.25	279.75	263.75
Tires, truck, 7.00-15, 6-ply	**52.20**	47.93	46.40	43.28
Tires, auto, tubeless, bias-belted, G78-15	**45.88**	43.43	42.95	40.25
FARM SUPPLIES				
Nail hammers, 16 oz. head, with handle	**9.57**	8.68	8.04	7.56
Nails, 8d common, per pound	**.54**	.50	.49	.48
Shovel, aluminum scoop	**18.55**	16.55	14.65	13.60
Pitchforks, 4-tine	**13.90**	12.35	11.15	10.85
Hoes, 7 inch blade	**7.63**	6.88	6.32	5.96
Grease gun, hand pressure, 1 pound capacity	**7.68**	7.14	6.97	6.58
Milk pails, heavy, tin-plated, 12 quart	**5.62**	5.18	4.85	4.83
Hand sprayer, pressure, 3-4 gallon capacity	**24.90**	23.10	21.65	20.40
Acetylene welder outfits, complete	**192.00**	181.50	181.50	171.00
Posts, line fence, wood	**2.63**	2.24	2.05	2.03
Post, line fence, steel	**2.58**	2.37	2.32	2.29
Barbed wire, galvanized, 12½ gauge, 4 point, per 80-rod spool	**33.68**	30.63	30.03	29.93
Field and stock fence, 6" stay wire sp., 32" high, per 20-rod roll	**67.13**	60.03	56.35	53.43
Battery fence charger, with batteries	**41.85**	39.50	37.60	34.70
Staples, fence, per pound	**.59**	.55	.53	.51
Adjustable end wrench, 10 inch	**8.42**	7.58	7.10	6.80
Electric drill, ¼ inch	**17.55**	17.10	15.60	14.40
Chain saw, gasoline, 20 inch	**271.00**	258.25	248.50	239.00
Iron pipe, galvanized, 1¼ inch, i.d., per foot	**1.50**	1.35	1.28	1.22
Rope, manila, ½ inch, per 100 feet	**19.85**	18.78	18.18	
Baler twine, per 40 pound bale	**16.48**	14.75	14.53	15.50
Electric cable, indoor, non-metallic sheathed, 2 wire, per 100 ft	**16.10**	13.75	13.40	13.20
Plastic tubing, 1 inch, i.d., per foot	**.22**	.21	.20	.19
BUILDING MATERIALS				
Rough boards, 1" for farm fences and construction, per 1,000 bd.ft.	**454.83**	401.00	371.17	338.50
Dressed boards, 1", s4s, standard and better, per 1,000 bd. ft.	**580.17**	504.17	436.33	407.00
Framing lumber, 2" x 4", fir, standard and better, per 1,000 bd. ft.	**429.83**	393.17	346.17	305.00
Asphalt shingles, mineral surface, approx. 240 lb. per sq.	**26.30**	23.68	21.68	20.78
Galvanized steel roofing, 28-29 gauge, per 100 sq. ft.	**37.18**	34.15	32.12	31.08
Portland cement, 94 lb. net	**4.58**	4.05	3.67	3.42
Concrete blocks, 8" x 8" x 16", per 100	**68.12**	60.62	54.93	50.05
House paint, exterior, per gallon	**13.50**	12.63	12.22	11.60

AGRICULTURE: How North Carolina Ranks Among States

1st	Flue-cured tobacco production
1st	Total tobacco production
1st	Sweet potato production
1st	Farm forest product receipts
2nd	Cucumbers for pickles (production)
2nd	Turkey production
3rd	Snap bean production
4th	Peanut production
4th	Commercial broiler production
4th	Blueberry production
5th	Cabbage production
5th	Green pepper production
6th	Burley tobacco production
6th	Number of farms (in 1980)
6th	Peach production
7th	Number of hogs on farms (12-1-79)
7th	Apple production
7th	Cash receipts from crops (1978)
8th	Egg production
8th	Strawberry production
9th	Grape production
10th	Greenhouse and nursery receipts
11th	Watermelon production
11th	Pecan production
12th	Cash receipts from farm marketings of all commodities (1978)
12th	Farm product export shares
13th	Corn production
13th	Sorghum grain production
13th	Flowers sold (wholesale value)
14th	Cotton production
14th	Tomato production
15th	Soybean production
15th	Oat production
16th	Barley production
17th	Irish potato production
18th	Cash receipts from livestock, dairy and poultry (1978)
19th	Honey production
21st	Milk production
25th	Winter wheat production
34th	Number of cattle on farms (1-1-80)
39th	Hay production

NOTE: Production based on 1979 data

STATISTICAL REPORTS PROGRAM

NORTH CAROLINA AGRICULTURAL STATISTICS brings together the current and historic statistics concerning agriculture in the State. Where possible, types of information most often requested by farmers, the general public, and workers in government agencies are included.

Reporting of crop and livestock statistics is a service rendered to farmers and others in the State by the Economics, Statistics, and Cooperatives Service of the U. S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture.

The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. Thus, in 1919 the N. C. Department of Agriculture entered into a cooperative agreement with the U. S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Crop and Livestock Reporting Service Division of the North Carolina Department of Agriculture.

The North Carolina Crop and Livestock Reporting Service publishes official statistics on crops, livestock, prices, and various other agricultural items. A list of the more important reports and the approximate dates of release is shown in the table at right. These reports may be obtained without charge by writing to Agricultural Statistician, P. O. Box 27767, Raleigh, North Carolina 27611.

In addition, semi-monthly releases entitled "Farm Report" are published to meet the needs of persons requiring information on a regular basis.

TYPE OF REPORTS	FREQUENCY OF REPORT	APPROXIMATE DATE AVAILABLE
I. CROP REPORTS		
1. Intentions to plant	Twice Per Year	Jan. 20, Apr. 15
2. Production of Field Crops, Fruits & Vegetables	Monthly (In Season)	10-12th
3. Crop Disposition & Value	Annually	April 10
4. Grain Stocks (All Positions)	Quarterly	25th of Jan Apr., June, & Oct
5. Annual Crop Summaries		
Small Grains	Annually	December 20
Other Field Crops	Annually	January 15
II. WEATHER-CROPS REPORTS	Weekly	Monday - 3:00 P.M.
III. LIVESTOCK REPORTS		
1. Cattle & Milk Cow Inventory, Jan. 1	Annually	January 30
2. Calf Crop	Annually	January 30
3. Pig Crop & Hog inventory	Quarterly	20th of Mar June, Sept. & Dec.
4. Commercial Slaughter	Monthly	22nd
5. Meat Animals - Farm Production, Disposition & Income	Annually	April 1
IV. DAIRY REPORTS		
1. Cows Milked & Milk Production	Monthly	12th
2. N. C. Dairy Report	Semi-Annually	Mar. 1, Sept. 1
3. Milk Production & Disposition	Annually	May 5
V. POULTRY REPORTS		
1. Poultry Inventory Dec. 1	Annually	January 30
2. Eggs, Chickens, Turkeys & Hatchery, Poultry Slaughter	Monthly	20th
3. Broilers Placed, Eggs Set and Hatched	Weekly	Wednesday-P.M.
4. Turkey Poults & Eggs Set	Weekly	Thursday-P.M.
5. Turkeys Raised	Annually	January 10
6. Turkey Breeder Hens	Semi-Annually	Sept. 20, Jan. 10
VI. PRICE REPORTS		
1. Prices Received By Farmers	Monthly	30th
2. Prices Paid By Farmers	Monthly	30th

FOREWORD

North Carolina farmers compete not only with producers from other States but also with our foreign neighbors. Having just returned from an overseas trip to promote North Carolina agriculture, I can speak from first hand experience and relate to you that the competition is keen. Nevertheless, we in this State are truly blessed with a wonderful climate, modern technology and the know-how to get the job done. We are also fortunate to have a capitalistic form of government that allows free enterprise and provides us a sound foundation on which to work.

Even though we continue to be the best agricultural producers in the world, we need to make marketing of our products the number one priority. The name of the game today is getting our crops and livestock to the people who need them. Our profits are tied directly to sound marketing techniques and I pledge the full support of the North Carolina Department of Agriculture in this endeavor. The main purpose of this bulletin is to provide the basic statistics needed to make sound marketing decisions. The detailed information listed in the following pages will assist those of us involved in day to day agricultural operations. Use these data wisely and they can help you.

Climate--Temperature And Precipitation 75
Statistical Reports Program 76

NOTE: All tables in this publication pertain to North Carolina unless otherwise specified.

REVIEW OF 1980 SEASON

1980 WEATHER AND CROP ROUND UP

North Carolina farmers generally had ideal conditions in 1980 for planting their spring crops. Moderate rainfall and favorable temperatures aided seed germination throughout the spring. Planting progress was completed on or ahead of schedule for all major crops, with the exception of sweet potatoes. As of June 1, soil moisture was adequate with most crops considered to be in fair to mostly good condition.

After June 1, soil moisture supplies began to dwindle and most crops were adversely affected. The only positive result of the dry weather was a reduction in the activation and spread of blue mold disease in the tobacco crop. Even though soil moisture improved somewhat toward the end of June, supplies became mostly short by the middle of July as temperatures averaged 2 to 4 degrees above normal and rainfall was only half of normal. The regions hardest hit by the drought were the Northern Coastal Plains and the Southern Piedmont. For the most part, the state's crops matured ahead of their 1979 progress due to the stress of dry weather and early planting dates.

The month of August began on a negative note with soil moisture remaining mostly short and all crop conditions continuing to decline. Throughout the period, temperatures averaged about 5 degrees above normal and rainfall registered below normal, statewide. Many of the state's major crops began showing signs of reduced yields during the month. The crops most severely affected by the dry conditions were corn, peanuts, and soybeans, with peanut yields being reduced by as much as 23% from the previous year. The state's peach and apple crops had an excellent level of production during 1980, even though the dry weather reduced fruit size somewhat.

Harvest activities for most crops surged ahead of schedule with late summer and fall weather remaining warm and dry. The harvest of sweet potatoes began slightly behind the previous year's progress because of a late planting date and slower plant development. Crop conditions continued to deteriorate throughout September as soil moisture supplies were considered 90% less than adequate by mid-month. Significant rainfall was received the last week of September, improving the soybean crop slightly but doing little for those crops already being harvested.

The month of October brought the state much needed rain with precipitation ranging from 2 to 5 inches, statewide. The harvest of peanuts and cotton remained significantly ahead of average as earlier dry soils had escalated the development of the two crops. November saw a return to more normal temperatures and rainfall as the harvest of most crops neared completion. The month of December was generally characterized by adequate soil moisture and above normal temperatures. Soybean harvest was virtually complete by month's end.

FLUE-CURED CROP LARGER

The 1980 flue-cured tobacco crop in North Carolina is estimated at 744.8 million pounds, up 22% from the 1979 production of 612.9 million pounds. Average yield per acre is estimated at 2,013 pounds, up 156 pounds from last year's low yield. Harvested acreage at 370,000 is up 12% from the 330,000 acres harvested in 1979.

The value of the crop at almost $1.1 billion was up 27% from the previous year. The season's average price was $1.463 per pound.

SOYBEAN CROP DOWN SHARPLY

Soybean production in North Carolina during 1980 totaled 35.7 million bushels, down 22% from last year's record crop of 45.8 million bushels. The drought during the summer months was primarily responsible for this year's poor yield. The yield per acre in 1980 averaged 18.5 bushels, 5 bushels below a year earlier and the lowest since 1968. Acreage harvested in 1980 totaled 1,930,000 acres, down 20,000 acres or 1% from 1979.

The total value of the crop at $280 million was down 5% from 1979. However, the season's average price was actually 22% higher at $7.85 per bushel.

CORN PRODUCTION DOWN

Production of corn for grain in North Carolina in 1980 totaled 103.8 million bushels, down 19% from the 1979 crop of 128.4 million bushels. The average yield of 60 bushels per acre was down 16 bushels from the previous year because of hot weather and drought. Acreage harvested for grain in 1980 totaled 1,730,000 acres, up 2% from the previous year.

North Carolina's corn crop was valued at $379 million, actually an increase of 4% from the previous year. The primary reason for this increase was an $.81 per bushel increase in average price to $3.65 per bushel.

BURLEY TOBACCO CROP DOUBLES

The 1980 burley tobacco production in North Carolina is estimated at 16.9 million pounds, almost double last year's disease reduced crop of 8.5 million pounds. The average yield per acre is estimated at 1,925 pounds, up 830 pounds from the previous year. Harvested acreage at 8,800 is up 1,000 acres from the 1979 crop year.

The value of production was $28.1 million, about 134% greater than the value of the 1979 crop.

PEANUT CROP SMALLER

The North Carolina 1980 peanut crop is estimated at 291.3 million pounds, down 23% from last year's production of 378.5 million pounds and the second lowest production since 1961. The drought conditions during the summer months hindered growth and development. The yield in 1980 averaged 1,755 pounds per acre, down 525 pounds from the previous year. Harvested acreage totaled 166,000 acres, same as in 1979.

The season's average price was $.226 per pound, an increase of 11% from 1979. However, due to the reduced production figure, value of the crop was down 15% at $65.8 million.

APPLE PRODUCTION UP AND PEACHES DOWN

Commercial apple production in North Carolina totaled a record high 410 million pounds in 1980, up 13% from the 1979 production of 362 million pounds. Of the total production, 406 million pounds were utilized compared to 361 million pounds the previous year.

Total production of peaches in 1980 for the Tar Heel State is estimated at 45 million pounds. This is 10% below the 1979 production of 50 million pounds and identical to 1978's production.

COTTON CROP LARGER

Cotton production in North Carolina during 1980 totaled 52,000 bales (480-lbs. net), up 21% from the previous year. The average yield per acre at 381 pounds is down 74 pounds from last year's yield of 455 pounds. Acreage harvested in 1980 totaled 65,000 acres, up 20,000 from 1979.

The value of cotton lint was $19.8 million, up 49% from the previous year. The season's average price at $.795 per pound was 23% higher than in 1979. Cottonseed was valued at almost $2 million in 1980, with a season's average price of $117 per ton.

YAM PRODUCTION DOWN

North Carolina continued in 1980 as the leading producer of sweet potatoes in the United States, accounting for 39% of the national total. The 1980 production of 4,255,000 cwt. is down 11% from 1979. The yield per acre at 115 cwt. was down 5 cwt. from the previous season. Acreage harvested at 37,000 acres is down 3,000 acres from 1979.

The season's average price at $10.80 per cwt. was an increase of $3.20 per cwt. over 1979. The total value of the crop was $45.9 million, up 26% from the previous year.

LIVESTOCK, DAIRY & POULTRY

NORTH CAROLINA
Crop & Livestock
Reporting Service

REVIEW OF 1980

TOTAL INCOME UP

Income from livestock, dairy and poultry products totaled approximately $1.5 billion in 1980, a 5% increase from 1979. All poultry products combined made up approximately $780 million while income for broilers alone amounted to $408 million or 27% of the total. Cash receipts from hogs at $317 million was up 6% from the previous year. This represents 21% of the total. Milk income at $221 million rose 15% from 1979. Income from cattle and calves dropped to $108 million, down 18% from the previous year. Cattle and calves accounted for 7% of total cash receipts.

FOURTH IN BROILERS

North Carolina held on to its number four ranking in broilers in 1980 with a total of 400 million birds produced, an increase of 6%. Meat produced increased 4% to 1.6 billion pounds.

The average price per pound for broilers rose 2% to 25.5 cents. This gave a gross income of $408 million for the state, a 6% increase from the previous year.

Income from broilers is the largest contributor to cash receipts for the livestock and poultry commodity group making up about 27% of the income for this group.

HOG PRODUCTION DROPS

The December 1, 1980 inventory of hogs and pigs on North Carolina farms showed an annual decrease of 7% to 2,460,000 head. The state continues to rank seventh nationally in total hog numbers. Farrowings were down 1% to 557,000 in 1980 for an average of 7.28 pigs per litter, about one tenth of a pig higher than the 1979 average. A crop of 4,057,000 pigs was produced in the state, only 12,000 pigs more than the preceding year.

Hog marketing at 3,872,000 head showed a 14% increase. Increased marketing, along with an 11% decrease in the average price at $37.60 cwt., gave a 6% increase in cash receipts to $317 million for the state. The value of home consumption was 14.1 million for the state.

MILK PRODUCTION UP

Total milk production at 1.6 billion pounds was up 4% from 1979. The number of milk cows increased 2% to 134,000 head for the state. Milk output per cow at 12,172 pounds increased 3% from the previous year.

Cash receipts from sales of milk and cream totaled $221 million, up 15% from a year earlier. The total value of milk produced was up 15% to $231 million. Fluid milk prices rose 10% from 1979 to $14.15 cwt.

EGG PRODUCTION UP

The number of eggs produced in North Carolina during 1980 at 3.2 billion was up 1% from last year. The average number of layers on hand was 13.2 million, down slightly from 1979. However, eggs per layer increased 1% from 1979 to the level of 240 eggs.

Cash receipts in the state was 1% higher in 1980 at $174 million, while the price of eggs per dozen increased less than 1% to 66.3¢. The state remained number 6 nationally in cash receipts from eggs.

NUMBER TWO IN TURKEYS

The state's 3% increase in total number of turkeys raised kept its number two position in the national ranking. Despite the increase to 23.8 million birds produced, the average weight per bird dropped causing total production to be virtually unchanged at 397 million pounds. Liveweight price at 40¢ was down 1¢ per pound resulting in gross income being 3% less at $159 million.

CATTLE INCOME DROPS

Cash receipts from cattle and calves in the state dropped 18% in 1980 to a total of $108 million. Fewer cattle marketed coupled with reduced average prices of $51.40 cwt. for cattle and $66.70 cwt. for calves caused the large decrease. The value of home consumption of cattle and calves dropped 4% in 1980 to $21.5 million.

The inventory of cattle and calves on Tarheel farms as of January 1, 1981 was 1.2 million head, up 7% from January 1, 1980. Calf births showed a 4% increase during the year at 490,000 head. Calf marketing dropped 6% to 165,000 head, while total cattle and calf marketing dropped 3% to 350,000 head.

SHEEP NUMBERS UNCHANGED

The number of sheep and lambs in North Carolina at 7,500 head as of January 1, 1981 was unchanged from a year earlier. The lamb crop was up 5% at 6,400 head for the year.

An increase in marketing of sheep was partially offset by a decrease in prices; however, a 3% decrease in cash receipts for the year to $150,000 was noted.

AGRICULTURE: How North Carolina Ranks Among States

1st.	Flue-cured tobacco production Total tobacco production Sweet potato production Farm forest product receipts
2nd.	Cucumbers for pickles (production)
3rd.	Turkey production Peanut production Hatching eggs
4th.	Commercial broiler production Blueberry production Burley tobacco production
5th.	Snap bean production Cabbage production Green pepper production
6th.	Peach production
7th.	Number of hogs on farms (12-1-80) Apple production Egg production
8th.	Strawberry production
9th.	Number of farms (in 1981) Grape production Watermelon production Pecan production Greenhouse and nursery receipts
10th.	Tomato production
11th.	Cash receipts from crops (1980) Rye production
12th.	Sorghum grain production Honey production
13th.	Farm product export shares Corn production Soybean production Flowers sold (wholesale value) Cash receipts from farm marketings of all commodities (1980)
14th.	Cotton production
16th.	Barley production
17th.	Oat production Irish potato production
18th.	Cash receipts from livestock, dairy and poultry (1980)
21st.	Milk production
22nd.	Winter wheat production
34th.	Number of cattle on farms (1-1-81)
38th.	Hay production

NOTE: Production based on 1980 data.

STATISTICAL REPORTS PROGRAM

NORTH CAROLINA AGRICULTURAL STATISTICS brings together the current and historic statistics concerning agriculture in the State. Where possible, types of information most often requested by farmers, the general public, and workers in government agencies are included.

Reporting of crop and livestock statistics is a service rendered to farmers and others in the State by the Statistical Reporting Service of the U. S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture.

The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Government in the development of agricultural statistics. Thus, in 1919 the N. C. Department of Agriculture entered into a cooperative agreement with the U. S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Crop and Livestock Reporting Service Division of the North Carolina Department of Agriculture.

The North Carolina Crop and Livestock Reporting Service publishes official statistics on crops, livestock, prices, and various other agricultural items. A list of the more important reports and the approximate dates of release is shown in the table at right. These reports may be obtained without charge by writing to Agricultural Statistician, P. O. Box 27767, Raleigh, North Carolina 27611.

In addition, semi-monthly releases entitled "Farm Report" are published to meet the needs of persons requiring information on a regular basis.

TYPE OF REPORTS	FREQUENCY OF REPORT	APPROXIMATE DATE AVAILABLE
I. CROP REPORTS		
1. Intentions to plant	Twice Per Year	Jan. 20, Apr. 15
2. Production of Field Crops, Fruits & Vegetables	Monthly (In Season)	10-12th
